If "settings" is pressed

Enter main hashtag:

Enter secondary hashtags:

1		2	
3		4	
5		6	
7		8	
9			

Upload:

1- Standby background image or animated gif
2- Loading image or animated gif
3- Detection image or animated gif
4- Thank you image or animated gif

Social media to be used:

Twitter ☐   Instagram ☐ Twitter + Instagram ☐

Save   Reset   Return

Hashtag can be written in any language especially English and Arabic.

Admin should not write the symbol hashtag. But the system should understand that it is a hashtag.

Browse the images or gifs

Admin ticks one of the boxes

If Saves:
The campaign and hall hashtags will be saved and these information can be accessed from the thumbnail on the main page

Reset clears call

Return to main page without saving

Example of completed page by admin

Enter main hashtag: SanDiego

Enter secondary hashtags:

1	sharksrule	2	Tree
3	Boy	4	Girl
5	Big	6	Small
7	0	8	0
9	0		

Upload:

1- Standby background image or animated gif

2- Loading image or animated gif

3- Detection image or animated gif

4- Thank you image or animated gif

Social media to be used:

Twitter ☐   Instagram ☐   Twitter + Instagram ☒

Save   Reset   Return

Here the software should launch a command.
For testing purposes, we will work on keyboard buttons, after we will replace them with a line of code to communicate with Arduino. I will send you these codes.

Hashtag 0 + Hashtag 1 > Return "A"
Hashtag 0 + Hashtag 2 > Return "B"
Hashtag 0 + Hashtag 3 > Return "C"
Hashtag 0 + Hashtag 4 > Return "D"
Hashtag 0 + Hashtag 5 > Return "E"
Hashtag 0 + Hashtag 6 > Return "F"
Hashtag 0 + Hashtag 7 > Return "G"
Hashtag 0 + Hashtag 8 > Return "H"
Hashtag 0 + Hashtag 9 > Return "I"

SAVE AS CSV

CLEAR DATA

Save the name of the accounts and tweets+ images of all people who participated

+ total count

This is important if 2 or more people tweet at the same time It will save in the database and the first one will appear.
After thank you page of tweet 1, tweet 2 will appear (slide 2).

Possibility of saving as .csv
